

Jongo

Query in **Java** as in **Mongo** shell

Origin

- 8 months on a **Mongo** real-life application
- Pleased by Mongo **shell** querying
- Not friendly with Mongo Java **driver**

Kata

Marketing asks
for users between
20-30 & 50-60 years old

Under the hood

- Binds Jackson to Mongo Java driver with the **slightest glue code** possible
- Made of **700 lines** of code
- Minimum effort to support **future operators**
- Handle **polymorphism** and partial loading

What's next

- Set **WriteConcern** for write operations
- Use operations: **aggregation**
- For more, **ask us**
